there is too much testing in american public schools that is robbing teachers of valuable instructional time some of it is mandatory but the vast majority is not and under the control of districts schools and even teachers to reduce testing too much provides a rationale and set of three models to use in cutting back on testing to reclaim valuable instructional time it also includes a high school case study describing how the themes proposed in the book can be accomplished instructional time is a complex subject that is discussed in detail and the underlying research why it is so important especially for disadvantaged children to address how best to cut back on non mandated testing there is a chapter written in plain terms on how to judge the value of a test three models are then discussed on how to approach cutting back on testing by as much as 25 that can recapture as much as ten days or more of instruction during a typical school year the goal of the book is to help school leaders and teachers find ways amongst current local testing practices to cut back improve their instruction and the educational experiences of their students

this book is about how our addiction to testing influences both society and ourselves as socially defined persons the analysis focuses on tests of people particularly tests in schools intelligence tests vocational interest tests lie detection integrity tests and drug tests diagnostic psychiatric tests and medical tests are included only tangentially a good deal of the descriptive material will be familiar to readers from their personal experience as takers and or givers of tests but testing as with much of ordinary life has implications that we seldom pause to ponder and often do not even notice my aim is to uncover in the everyday operation of testing a series of well concealed and mostly unintended consequences that exercise far deeper and more pervasive influence in social life than is commonly recognized

software is continuously increasing in complexity paradigmatic shifts and new development frameworks make it easier to implement software but not to test it software testing remains to be a topic with many open questions with regard to both technical low level aspects and to the organizational embedding of testing however a desired level of software quality cannot be achieved by either choosing a technical procedure or by optimizing testing processes in fact it requires a holistic approach this brief summarizes the current knowledge of software testing and introduces three current research approaches the base of knowledge is presented comprehensively in scope but concise in length thereby the volume can be used as a reference research is highlighted from different points of view firstly progress on developing a tool for automated test case generation tcg based on a program s structure is introduced secondly results from a project with industry partners on testing best practices are highlighted thirdly embedding testing into e assessment of programming exercises is described
